

在推行網上學習的初期，學校提供網上教材及短片，鼓勵學生在家自行學習，及後因疫情停課持續，為使學生能維持每天早起上學的學習規律，同時亦讓老師了解及跟進學生在家中的學習成效，學校

推行網上實時授課，以加強與學生的互動。過程中，學生們在停課期間能透過電子屏幕與老師和同學一起學習和分享，大家都表現雀躍，也非常投入課堂，老師們也透過網課與學生互動，了解學生的學習表現，並提供即時回饋，提升學與教的效能。

在網上實時課堂中，老師們運用不同的教學策略，如回應卡、詞彙卡、電子書、遊戲軟件等，為學生提供多元化的學習模式，以提升學習趣味。

學校言語治療及職業治療的專業團隊，以網上教學形式繼續為學生提供適切的治療和支援，透過郵寄學習材料包，讓學生能運用相關教材在網上實時課堂中同步參與實作練習，維持恆常持續的訓練。

指導家長在家中為子女提供職業治療的訓練

班際家庭活動

在「疫」境下難免會出現抗疫疲勞的情況，為此，學校創作了抗疫歌曲及短片，以輕鬆的手法，為學生及家長發放正能量，增強抗逆力。學校亦透過每月的「網上週會」，在短講中分享及關顧學生的身心健康，以助他們積極面對「疫」境，在聖誕節及農曆新年期間，學校舉行了網上班際家庭活動，加強與家長溝通之餘，亦了解及關愛學生的成長需要，發揮家校合作的精神。

在暫停面授課堂期間，學校亦明白家長們需要照顧在家「上課」的子女，同時亦需處理日常事務及張羅防疫物品，難免身心受壓，有見及此，自閉症輔導組與教育心理學家舉辦了多次網上家長工作坊，透過專題講座及討論，讓家長互相分享照顧孩子的心得，也獲渠道抒發在疫情期間的壓力。

童心抗疫2打氣影片

網上家長工作坊

抗疫前路仍然漫漫，雖然困難，但謹記艱難的時刻總會過去。疫境中願大家牽手同行，攜手合作協助我們的孩子「疫」境自強，不論在情緒上、心靈上、知識或技能上的增值，都必終生受用，願我們的孩子堅守這「不畏艱難，積極樂觀」的學習態度，在疫境中茁壯成長。

# E-learning Arrangements for Non-Face-to-Face Lessons

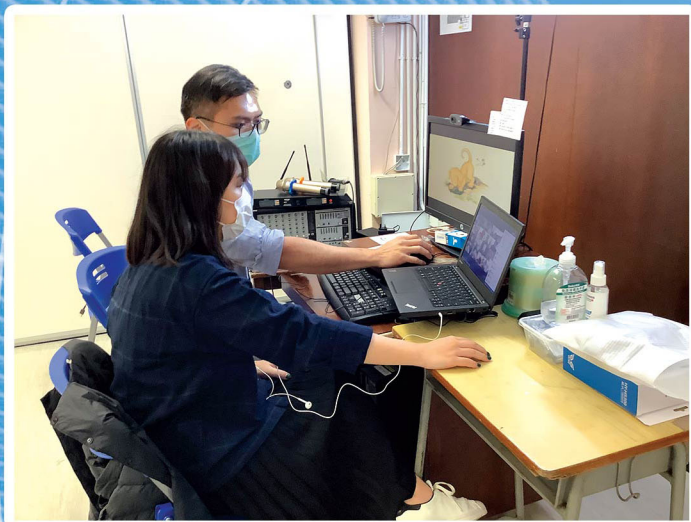

In the past year, the situation of COVID-19 outbreak remained volatile. A number of measures have been implemented while teaching strategies have been adjusting adequately for the purpose of satisfying students' learning needs. Therefore, students were able to achieve the aim of "suspending classes without suspending learning".

Students were required to learn online at home during the pandemic. Yet, some students did not possess any mobile computer devices. With the aim of ensuring all students could learn online, arrangements of borrowing tablets and other devices to students in need were made in late August last year. Meanwhile, the school helped eligible students apply for the Community Care Fund on purchasing mobile computer devices.

To build life-learning skills in students, teachers have been creating and uploading e-books based on the contents of modules to Rainbowstar (an e-learning platform) regularly. Thus, students could browse through teaching resources and exercises on Chinese, English, Mathematics and other subjects so as to consolidate the knowledge acquired previously. Moreover, parents were capable of accompanying their child on revising the content of the subjects and acknowledging their child's learning progress via the platform.

Online teaching resources and videos were provided to encourage students to learn from home during the early stage of pursuing e-learning. As the suspension of class continued due to the pandemic, real-time online teaching was put into practice so that students could maintain themselves as an early riser. Furthermore, teachers were able to examine and understand students' home learning progress and thus to enhance teacher-student interaction by implementing real-time online teaching. In the course of e-learning, students learned and shared their thoughts with teachers and classmates via an online video conferencing platform. Conducting online classes made students truly excited and engaged, while teachers could track students' learning performance and provide instant feedback to students. Therefore, the effectiveness in learning and teaching would be improved.

In e-learning lessons, different teaching strategies have been adopted to provide a diversified learning style for students to study. Response cards, vocabulary cards, e-books and game apps were utilized so as to enhance students' interest in learning.

Applicable trainings and support have been providing to students by the school's speech therapy team and occupational therapy team. By mailing the learning resources packages, students were capable of using the materials related to real-time online training classes at home so that constant training could be retained.

Real-time online speech therapy lessons

It was inevitable to feel exhausted in the fight against the virus. Because of this, the school created anti-epidemic theme songs and short videos for students and parents so that we could be resilient

Inter-class Family Fun Day

and surround ourselves with positive energy under the pandemic. The school assembly, which was held online every week, shared speech on taking good care of students' mental and physical health and helped them face COVID-19 actively. To achieve Home-School Co-operation, Inter-class Family Fun Day was organized during Christmas and Lunar New Year holidays as a means to not only strengthening the communication with parents as well as understanding and caring for the growth needs of our students.

"Let's Fight the virus Maryrose" theme song

Online workshops for parents

During class suspension, considering parents' stress from looking after the students who learned from home, dealing with daily affairs to purchasing anti-epidemic products, the RTA team and the educational psychologist organized online parents' workshops various times. Parents' stress could be relieved, thoughts on taking care of the children could be shared by joining the seminars and discussions.

There is still a long way to fight the virus. Even though it is very demanding to fight against it, please remember these times are hard, but they will pass. Let us hold our hands together and support our children to stay strong emotionally, mentally, academically and technically. These qualities are timeless throughout their lives. May we hope our students stick to the motto "not to be afraid of difficulties, stay active and positive" and grow strong and healthy under the pandemic.

## 教職員培訓活動

本年度學校也致力培訓教職員在STEM方面的學習和發展，透過3月19日參與香港迪士尼樂園提供的「迪士尼STEM體驗行」和「迪士尼動畫教室」等研習活動，及5月3日邀請外間機構到校提供的STEM工作坊，讓教師團隊體驗多元化的STEM學習模式，從中掌握一些STEM的教學技巧外，也令學校探索STEM校園化的發展方向。

## 2020-21 STEM Professional Development for Staff

This year, the school continued to make efforts in teachers' training and development in STEM Education. Our staff experienced a diversified STEM-learning modes and mastered STEM teaching skills from different workshops. The school participated the "Disney's STEM Exploration" and the "Disney's Creative Storytelling" organized by the Hong Kong Disneyland Resort on 19th March, as well as a STEM workshop, which was invited to hold at school by the Unihub Workshop, was conducted on 3rd May. Thus, these trainings led the school to explore the approaches in developing STEM education.

## 潛能發展 Potential Development

今年潛能發展組透過參與百佳綠色學校計劃、校園藝術大使計劃和《多一點藝術節2020》網上導賞團，發展學生的不同潛能。疫情下學生透過不同的活動模式，來參與本組舉辦的活動，如名字拼寫班、點墨名人畫班、種植小組、季度農墟、校園藝術大使「走進名畫世界」藝術推廣，讓同學體驗不同活動，培養多元興趣之外，也發揮潛能。

This year, the Potential Development Group developed students' potential via participating various activities, including the PARKnShop's Green School Programme, the Arts Ambassadors-In-School Scheme and an online guide tour organized by the A Bit More Than Arts Festival. Students joined the activities through different participation patterns. Students engaged in events such as the "Funny Way to Write My Name Class", "A Puzzling Colour-By-Numbers Class", the Planting Team, the Season Farm Bassar as well as the "Entering into the Great Masterpieces" by the Arts Ambassadors. Therefore, students were able to cultivate multiple hobbies and develop their potential by taking part in the events.
